

Breast Cancer Prediction App

This application predicts whether a tumor is malignant or benign based on the input features from the Breast Cancer dataset. Enter the values for each feature, and the app will predict the outcome.

Enter value for Mean radius:

13.54 - +

Enter value for Mean perimeter:

87.46 - +

Enter value for Mean area:

566.30 - +

Enter value for Mean concavity:

0.07 - +

Enter value for Mean concave points:

0.05 - +

Enter value for Worst radius:

15.11 - +

Enter value for Worst perimeter:

99.70

- +

Enter value for Worst area:

711.20

- +

Enter value for Worst concavity:

0.24

- +

Enter value for Worst concave points:

0.13

- +

Predict

Prediction: **Malignant**

Probability of Malignancy: 92.29%
